## National Survey for General Public Sample

[Information in brackets describes the formatting and flow of the survey in its online version.] It is not displayed to participants. [PEI] denotes a place where the name of a participant's assigned PEI is automatically piped into the survey text.

## **Research Participant Information and Consent Form**

## 1. EXPLANATION OF THE RESEARCH and WHAT YOU WILL DO

You are being asked to participate in a research project that will ask you about your views about clinical depression and its treatment. After answering a few preliminary questions, you will watch a brief video showing a hypothetical interaction between a psychiatrist and patient. You will then answer a few questions about the video before answering some other questions about the proposed intervention featured in the video. At the end, you will answer some basic questions about yourself (age, education, etc.). Completing this survey should take approximately 18-20 minutes. You must be at least 18 years old to participate in this research.

## 2. YOUR RIGHTS TO PARTICIPATE, SAY NO, OR WITHDRAW

Participation in this research project is completely voluntary. You have the right to say no. You may also change your mind at any time and stop answering questions or skip a question if you are uncomfortable with any question.

## 3. COSTS AND COMPENSATION FOR BEING IN THE STUDY

You will not incur any costs for participation in this research. For your participation, you will be compensated through your regular contract with your panel provider.

## 4. CONTACT INFORMATION FOR QUESTIONS AND CONCERNS

If you have concerns or questions about this study, please contact the researcher by postal mail: Michigan State University; East Lansing, MI 48824, or by phone at , o

, or by e-mail:

## 5. CONSENT TO PARTICIPATE

By clicking on the following button, you indicate your voluntary agreement to participate in this online survey. I agree to participate.

When you have completed answering the question on each page, click on the right arrow at the bottom of the page to advance.

#### Please Tell Us about Yourself

What is your gender? male female non-binary prefer to self-describe: How old are you as of today? 18-24 25-34 35-44 45-54 55-64 65 or older Are you Hispanic, Latino, or Chicano? no yes What is your race/ethnicity? Select all that apply. White Black or African-American Native Hawaiian or Other Pacific Islander Native American/American Indian or Alaska Native Asian or Asian-American Arab-American or Middle Eastern other (please specify):

Information about income is very important to understand. Would you please give your best guess? Please indicate the answer that includes your entire household income (previous year) before taxes.

less than \$25,000 \$25,000 to \$49,999 \$50,000 to \$74,999 \$75,000 to \$99,999 \$100,000 to \$149,999 \$150,000 to \$199,999 more than \$200,000

## Your Caregiving Experience

Have you received a CLINICAL DIAGNOSIS of any of the following mental health disorders? Select all that apply.

bipolar disorder clinical depression generalized anxiety disorder obsessive compulsive disorder post-traumatic stress disorder I have never been diagnosed with a mental health disorder [If participant selected "clinical depression" to prior question, drop them from the survey.]

In the last TWO YEARS, have you been the PRIMARY CAREGIVER for a family member, spouse, or close friend with clinical depression?

By "care," we mean helping them with daily activities, driving them to appointments, offering emotional support, etc.

No, I have no family member, spouse, or close friend with clinical depression.

No, I have a family member, spouse, or close friend with clinical depression, but I did not provide care for them.

Yes, I have provided care for a family member, spouse, or close friend with clinical depression.

[If participant selected either "no" option to prior question, move them to first question on the next page]

[If participant selected "yes" to prior question, drop them from the survey.]

### Your Views on Potential Sources of Mental Health Information

Where have you gotten information about mental health in the LAST 12 MONTHS? Select all that apply. [item order is randomized] my primary care physician

psychiatrists psychologists or other mental health care providers newspapers or newsmagazines movies or television shows websites or social media family members or friends scientific articles or books

How much do you DISTRUST or TRUST each of the following groups or organizations when it comes to information about your mental health?

naithan

	strongly	moderately	slightly	distrust	slightly	moderately	strongly
[item order is randomized]	distrust	distrust	distrust	nor trust	trust	trust	trust

## A Short Video on Clinical Depression and Its Treatment

We would like you to watch a short video featuring a HYPOTHETICAL INTERACTION between a psychiatrist and her patient with treatment-resistant depression, a type of clinical depression that is rather difficult to treat.

This video is a core element of our research study.

Thus, it is important to us that you CAREFULLY WATCH this hypothetical scenario IN ITS ENTIRETY.

If you are completing our survey on your smartphone, you may need to turn your phone 90 degrees (to landscape orientation) to see the full screen.

On subsequent pages, we will ask you several questions about the proposed intervention that is featured in the video.

[experimental stimulus: one of eight randomly assigned embedded videos]

Thanks for carefully watching this hypothetical scenario, which is central to our research study.

## A Few Questions about the Hypothetical Interaction in the Video

How many trials of antidepressants has Mary tried so far?

none, only psychotherapy

one trial of antidepressants

two trials of antidepressants

three trials of antidepressants

Given what you saw in the video, rate Mary's clinical depression on the following scale.

mild				severe				
depression		depression				depression		
1	2	3	4	5	6	7		

What BEST describes the essence of the new intervention that Dr. Wilson suggested to Mary?

the intervention works via ingested mood-altering chemicals

the intervention sends electrical stimulation through the scalp

the intervention sends magnetic stimulation through the scalp

the intervention sends constant electrical stimulation through a brain implant

the intervention sends variable electrical stimulation through a brain implant

Using the scales below, tell us what you think of the new intervention that Dr. Wilson suggested to Mary. *On some smartphones, you may need to scroll left and right to see the full horizontal scale.* In your opinion, [PE] seems: [item order is randomized]

ir opinion, [PEI] seems: [item order is randomized]	
dangerous	safe
scary	comforting
inhumane	humane
crude	sophisticated
disgusting	pleasant
barbaric	civilized
dubious	reputable
unpredictable	predictable

## Some Questions about [PEI]

We will now ask you some questions about the proposed intervention featured in the video. For each question on this page, place yourself in Mary's shoes and think about the intervention that Dr. Wilson proposed.

We want to know YOUR VIEWS AND ATTITUDES about this intervention.

	DED doodt in							
In your view, how much would getting [PEI] INTERFERE with the following aspects of Mary's life?								
	not at all	minimally	somewhat	moderately	substantially	greatly		
[item order is randomized]	interfere	interfere	interfere	interfere	interfere	interfere		
the physical structure of her brain								
the electrical signals in her brain								
her bodily functioning in general								
her sense of self								
her expression of emotions								
her daily lifestyle								

In your view, how much of a NEGATIVE or PC	strong	moderate	slight	no	slight	moderate	strong		
[item order is randomized] Mary's agency or free will Mary's authentic self Mary's ability to function in daily life Mary's independence Mary's self-control Mary's influence over her life circumstances Mary's personality	negative influence	-	negative influence	influence at all	positive influence	positive influence	positive influence		
In your view, to what extent would each of the f	ollowing be a	RISK for Ma no ri			t modera	te substantia	al great		
[item order is randomized] it causes physical injury (e.g., brain damage) it creates biochemical dependence (e.g., increase it triggers personality change (e.g., erratic mood it produces cognitive impairment (e.g., memory it provokes social stigma (e.g., negative peer juc	s) loss)	at a		-	risk	risk	risk		
In your view, to what extent would each of the following be a BENEFIT for Mary getting [ <b>PEI</b> ] no benefit minimal slight moderate substantial great									
[item order is randomized] it precisely targets depression in Mary's brain it is safer than taking antidepressant medications it quickly relieves depression symptoms its stimulus is not addictive its stimulus is easily adjustable it reduces Mary's need to take a daily antidepres with it, Mary won't have to talk about her feelin	ssant drug	at a		0		t benefit	-		
Some More Questions about [PE]									
Use the following scale. In your view, how bad moderately	would it be to	o live with tre	atment-resis	stant depress	ion every da	ay?	extremely		
bad 1 2 3	4	5	6	7	8	9	bad 10		
Think about the symptoms of treatment-resistan captures your current thinking on these? Overall, I think [PEI] seems than I much worse than slightly worse than the same as slightly better than much better than	-	-			Which phra	se below BE	ST		
In the comment box below, please FULLY EXP The more details that you provide, the better we [insert comment box]						ch project.			
If you were in Mary's shoes, how UNLIKELY of very unlikely somewhat unlikely I'm not sure	or LIKELY w	rould you be to	o get [ <mark>PEI</mark> ] :	to improve y	our depressi	ion?			

I'm not sure somewhat likely very likely

### A Few More Questions about [PEI]

				neither				
	strongly	moderately	slightly	oppose	slightly	moderately	strongly	
[item order is randomized]	oppose	oppose	oppose	nor support	support	support	support	
use state tax revenue to cover the costs of								
using [PEI] for treating depression for those								
with verified financial need								

using [PEI] for treating depression for those with verified financial need use state tax revenue to fund more research on using [PEI] for treating depression require each county to have at least one medical facility that offers [PEI] for treating depression prohibit the use of [PEI] for treating depression until we have more evidence of its safety and efficacy prohibit the use of [PEI] for treating depression in legal minors (under the age of 18) ban all use of [PEI] for treating depression

Below are potential factors that may limit the use of [PEI] for addressing treatment-resistant depression in society generally. Please indicate what you think are the THREE MOST IMPORTANT PRACTICAL BARRIERS to its use. [item order is randomized]

Enter "1" to the left of the factor you think is the **first** most important barrier.

Enter "2" to the left of the factor you think is the **second** most important barrier.

Enter "3" to the left of the factor you think is the **third** most important barrier.

- \_\_\_\_ limited evidence of the treatment's effectiveness
- \_\_\_\_ lack of understanding of [PEI]
- \_\_\_\_ out-of-pocket cost
- \_\_\_\_ lack of insurance coverage
- \_\_\_\_ low public trust in mental health system
- \_\_\_\_\_ treatment is not available in all geographic areas
- \_\_\_\_\_ stigma about treatment
- \_\_\_\_ frequency of treatment

Below are other potential concerns you may have about [PEI] for addressing treatment-resistant depression. Please indicate your THREE TOP CONCERNS about its use. [item order is randomized]

Enter "1" to the left of the item that is your **first** most important concern.

Enter "2" to the left of the item that is your **second** most important concern.

Enter "3" to the left of the item that is your **third** most important concern.

limited evidence of the treatment's safety

- \_\_\_\_\_ treatment is too intrusive
- \_\_\_\_\_patient may lack sufficient information for informed consent
- \_\_\_\_\_ treatment may be delivered without the patient's consent
- \_\_\_\_ patient not getting the treatment when it would actually help them

## Please Tell Us about Yourself

Before today, were you aware of any of the following interventions? Select all that apply.

an adaptive brain implant

antidepressant medication

deep brain stimulation electroconvulsive therapy

psychotherapy

repetitive transcranial magnetic stimulation

vagus nerve stimulation

I was unaware of all of these

What is the highest degree or credential you have earned? 12th grade or less high school diploma or GED equivalent associate's degree bachelor's degree professional degree (e.g., law or medicine) doctorate degree

Do you think of yourself as liberal or conservative? very liberal

liberal slightly liberal middle-of-the-road slightly conservative conservative very conservative

How often do you attend religious services?

never about once a year a few times a year once a month a few times a month every week more than once a week

# Thank You!

Thank you for participating in our study. Please let us tell you more about it.

We are investigating people's views on a class of interventions for treatment-resistant depression that are called psychiatric electroceutical interventions (PEIs). Specifically, we are examining how the severity of a patient's depression and the characteristics of a PEI may influence people's views about such an intervention.

We created eight videos that featured a hypothetical interaction between a psychiatrist and her patient. Each character was played by a professional actor. **Example 1** was the psychiatrist "Dr. Erica Wilson," and **Example 2** was the patient "Mary." Sue Way recorded and edited the videos.

You were randomly assigned to watch one of these eight video vignettes. Your video vignette highlighted one of four PEIs: electroconvulsive therapy (ECT), repetitive transcranial magnetic stimulation (rTMS), deep brain stimulation (DBS), or an adaptive brain implant (ABI). Also, your video vignette presented a patient with either moderate or severe depression.

ECT and rTMS are approved by the US Food and Drug Administration (FDA) as therapies for depression. DBS and ABIs are still under investigation and are not FDA-approved therapies for depression.

Your participation in this study is really important to us, and your answers will help advance our understanding of how people view these types of interventions for treatment-resistant depression.

Thank you!
